zaro architects, Cairo, Egypt
www.zaroarchitects.com

- Prepare and present design proposals to client
- Build concept plans, designs and design solutions
- Develop overall design architectural strategy
- Produce detailed workings, drawings and specifications
- Advise clients on the practicality of their project
- Use IT in architectural drawing and design, specifically using software packages
- Resolve problems and issues that arise during construction/installation in coordination with the Construction Manager
- Institute an appropriate architectural methodology (from initiating drawing, through to plan, execution, monitoring, control and closure) for projects and drive its successful implementation in coordination with the Operations Manager
- Site visit and supervise site related processes and procedures ensuring that works are carried out to specification
- Lead liaison and engagements with clients, consultants, contractors, vendors on architectural requirements and design concepts
- Initiate and control related processes and procedures ensuring that works are carried out to specific standards
- Provide status report of ongoing projects, highlighting any installation/drawing design policy and procedural violations in coordination with the Operations Manager

- Execute timely implementation schedules and efficient follow through on deliverables and address issues as appropriate in coordination with the Operations Manager
- Perform such architectural and design activities as to Manage the Design Team.
